

Muhammad Ikmal Bin Hatimul Asam

IT Support Technician | Level 1 Networking & Helpdesk

Teluk Intan, Perak, Malaysia | ffzikmal12@gmail.com | +60 14 396 0048 | linkedin.com/in/ikmalffz12

PROFESSIONAL SUMMARY

IT-trained professional with hands-on experience in PC/laptop assembly, hardware troubleshooting, and end-user technical support, complemented by 3 years of operational experience managing warehouse systems. Currently building a personal homelab focused on network configuration (pfSense) and pursuing AWS Cloud Practitioner certification to deepen cloud fundamentals. Seeking a Level 1 IT Support or Networking role to transition back into tech full-time and grow practical skills in a structured environment.

WORK EXPERIENCE

Inventory Administrator

2024 – Present

ILLEGear SDN BHD | TTDI, Kuala Lumpur

- Operated and troubleshooted barcode scanners, label printers, and handheld inventory devices — coordinated with internal teams to resolve hardware faults and minimise downtime.
- Maintained accurate stock records using warehouse management software (SQL Connect)
- Served as point-of-contact for equipment issues, logging faults and following up with vendors and suppliers for repairs and replacements.

PC & Laptop Technician | Inventory Administrator

2022 – 2024

ILLEGear SDN BHD (Internal Transfer) | TTDI, Kuala Lumpur

- Assembled and configured desktop PCs and laptops including hardware installation (RAM, HDD/SSD, GPU, PSU) and OS setup for end users.
- Provided Level 1 technical support to internal staff — diagnosing software errors, peripheral issues, and connectivity problems.
- Promoted to Inventory Administrator role after demonstrating reliability and strong operational performance within the first year.

Inventory Administrator

2021 – 2022

DirectD Retail & Wholesale Sdn Bhd | Petaling Jaya, Selangor

- Operated and troubleshooted barcode scanners, label printers and troubleshooting office laser printer to minimize operation downtime.

PROJECTS & SELF-DEVELOPMENT

Home Network Lab (In Progress)

2024 – Present

- Configured a pfSense/Omada router from scratch — set up WAN/LAN interfaces, DHCP server, firewall rules, and basic traffic segmentation.
- Deployed virtual machines using Proxmox to simulate client-server environments and practice OS installation and network configuration.
- Using the lab to study subnetting, DNS, DHCP, and routing concepts hands-on.

EDUCATION

Diploma In Computer Science (Internet Computing)

2018 – 2020

Sultan Idris Education University | GPA: 3.29 / 4.0

CERTIFICATIONS & TRAINING

- **AWS Cloud Practitioner** – In Progress – Expected June 2026 *Covering cloud concepts, core AWS services, security, and pricing models*
- **PC Assembly & Hardware Servicing** – Completed – 2023 *Hands-on training in desktop/laptop build, diagnosis, and repair*

TECHNICAL SKILLS

Hardware	PC/Laptop Assembly • HDD/SSD/RAM Install • Peripheral Troubleshooting • Barcode Scanners
Networking	pfSense • TCP/IP • DHCP • DNS • LAN/WAN • Firewall Rules (basic)
Operating Systems	Windows 10/11 • Basic Linux (learning)
Virtualisation	Proxmox • VM Deployment & Configuration
Cloud	AWS Fundamentals (in progress) • Cloud concepts & architecture
Software & Tools	Warehouse Management Software Barcode/Inventory Systems • Microsoft Office / Excel
